City of Carlsbad and Carlsbad Redevelopment Agency
Request for Official Notice of Their Official Acts Regarding Land Use Conformance

The City Council of the City of Carlsbad and the Carlsbad Housing and Redevelopment Commission respectfully request that the California Energy Commission take official notice of Resolution 2011-230 and Ordinance CS-158 (Attached).

The purpose of this resolution and ordinance is to provide greater clarity regarding which land uses throughout the City, including the Coastal Zone, are authorized for the generation of electricity and its limitations.

In previous written and oral testimony in the Carlsbad Energy Center Project (CECP) proceeding, the City of Carlsbad City Council and the Carlsbad Housing and Redevelopment Commission have made several official determinations that the proposed CECP does not comply with land use laws, ordinances, regulations, and standards (LORS) because, a) it is a merchant power plant, b) it is located within the coastal zone, c) not coastal dependent and, d) is not a smaller power plant as understood and envisioned by Redevelopment Agency. The Redevelopment Agency has also determined that the CECP has failed to attempt even the most basic form of compliance, that of filing for a Redevelopment Permit.

The Energy Commission's June 2011 Presiding Member's Proposed Decision (PMPD) disregarded these official actions and came to a different conclusion on project compliance based on its own interpretation of the City's and Redevelopment Agency's applicable LORS.

The PMPD did, however, provide valuable insight into its evaluation and the criteria it applied to its analysis. What became clear through reading the PMPD is that the interwoven land use regulations under which the City and Redevelopment Agency work with daily are confusing and perplexing to those not familiar with them.

In response to what the City and Redevelopment Agency consider is an incorrect interpretation by the PMPD and in an effort to make its land use regulations more understandable, the City Council has made amendments and clarifications to its General Plan, Zoning Ordinance, and other relevant land use documents. These clarifications focus on land use adjustments that specifically address the generation of electrical energy throughout the City including the Coastal Zone, and the Encina Power Station.

At its September 27, 2011 meeting, the City Council of the City of Carlsbad unanimously adopted Resolution 2011-230, which is an amendment to the General Plan Public Utilities land use designation. It also adopted Ordinance CS-158, which is an amendment to the Public Utility Zone list of permitted uses (Municipal Code Section 21.36.020). Both amendments concern the generation of electrical energy in the City of Carlsbad.

With regards to the General Plan Amendment, the description of the Public Utilities land use designation has been changed to add the following clarification about the generation of electrical energy:

:

A primary function designed to serve all or a substantial portion of the community may also include the generation of electrical energy if it is located outside the Coastal Zone but only if it is conducted by a government entity or by a company and such use is authorized or approved by the California Public Utilities Commission.

As contained within Table A of the Zoning Ordinance Section 21.36.020, two (2) significant amendments have been established that are consistent with and implement the General Plan. These amendments allow:

Generation of electrical energy, primary, by a government entity or by a company authorized or approved for such use by the California Public Utilities Commission outside the City's Coastal Zone only.

Generation of electrical energy, accessory, by a government entity or by a company authorized or approved for such use by the California Public Utilities Commission in or outside the City's Coastal Zone and limited to a generating capacity of fewer than 50 megawatts. Generating capacity of 50 megawatts or more is prohibited in the Coastal Zone.

The clear reading of these amendments results in a General Plan and Zoning Ordinance that prohibits a primary land use in the Coastal Zone which proposes energy production. Such a use is allowed in the City outside of the Coastal Zone in two situations. First, if it conforms to City standards and it has received prior approval or authorization from the CPUC. Second, if applicant is a government entity. Additionally, the amended Zoning Ordinance allows for power generation as an ancillary use within the City (including the Coastal Zone), as long as the power generated is less than 50 MW. Again, conformance with the code requires prior approval or authorization from the CPUC or that the applicant is a government entity.

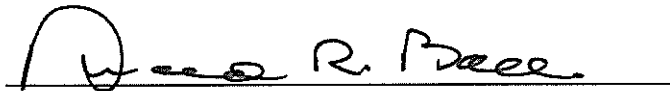

Finally, other land use documents that regulate land use at the Encina Power Station and environs, including the Agua Hedionda Land Use Plan, Encina Specific Plan, and Encina Power Station Precise Development Plan, were also amended to remain consistent with the approved General Plan and Zoning Ordinance changes.

The City Council and the Housing and Redevelopment Commission want to make it abundantly clear that the impact of these changes applies to the CECP as it relates to its compliance or lack thereof with local LORS. (*City of Claremont v. Cruse* (2009) 177 Cal App. 4th 1153, 2009, rev. denied.)

The City Council and the Housing and Redevelopment Commission appreciate the opinions and insights of the PMPD. With the recent amendments, the City and the Redevelopment Agency is confident that the plain reading of the General Plan and the Zoning Ordinance removes any prior confusion regarding the CECP's land use conformance with LORS.

Thank you for considering these issues.

Respectfully submitted:
